PATENT

IN THE CLAIMS

1. (currently amended) Wiper assembly for wiping a print head with a nozzle plate in an inkjet printing system, the wiper assembly comprising:
 - at least ~~one~~ two wiper blade blades;
 - a rigid blade holder for supporting the wiper ~~blade~~ blades;
 - at least one rigid clamping block extending a length of the wiper ~~blade~~ blades for clamping and securing the wiper ~~blade~~ blades between the blade holder and the clamping block, wherein at least two of said wiper blades are clamped separately by said blade holder.
2. (currently amended) Wiper assembly according to claim 1 wherein ~~a depth over which the wiper blade is clamped by the wiper blade holder is at least 20% of a wiper blade height~~ at least one said wiper blade has a protruding heel.
- 3-6 (canceled)
7. (currently amended) ~~Wiper assembly according to claim 1~~ Wiper assembly for wiping a print head with a nozzle plate in an inkjet printing system, the wiper assembly comprising:
 - at least one wiper blade;
 - a rigid blade holder for supporting the wiper blade;
 - at least one rigid clamping block extending a length of the wiper blade for clamping and securing the wiper blade between the blade holder and the clamping block, wherein the at least one said wiper blade has a protruding heel.
8. (currently amended) Wiper assembly according to claim ~~1~~ 7 wherein ~~the assembly forms an integral replaceable module further comprising two or more said wiper blades wherein at least two of said wiper blades are clamped separately by said blade holder.~~
9. (canceled)
